

The Assistant **BASIC TRAINER**

READY-TO-USE

The Basic Trainer combines the necessary components of the brake system to create a simulator that is affordable and ready to perform manual tug tests

**Exposed drum offers drivers an inside look at the brake
Comes with choice of automatic or manual slack adjuster
Tabletop model allows for easy viewing during training sessions
No need to connect to an air supply**

The Basic Trainer is constructed from real working components in a compact, easy to view configuration
